

Pyanchor[®] ULTRA

8.5 EC

Pyribenzoxim + Cyhalofop Butyl

PREMIUM HERBICIDE

A Broad Spectrum Wide Window of Application Herbicide for the Modern Day Filipino Farmer

Pyanchor Ultra 8.5 EC provides perfect one-shot weed control against grasses, broadleaves and sedges in rice with its unique combination of Pyribenzoxim and Cyhalofop Butyl. The two active ingredients in the formulation allows double action weed killing power within less than 24 hours after application. It is capable of controlling hard to kill weeds like *Leptochloa chinensis* up to 25 days after seeding. Leaving the rice field free of nutrient competition from weeds to maximize yield potential.

Dosage:
1 L/ ha at a water delivery
rate of 160-184 L (10-12
tank loads)/ ha
