## 5 EC

Pyribenzoxim

HERBICIDE

### Contact, Selective Systemic and Early, Mid to Late Post Emergent Herbicide

Pyanchor 5 EC provides complete control of grasses, sedges and broadleaves in rice with its unique ingredient of Pyribenzoxim. The active ingredient allows weed killing power within less than 24 hours after application. Leaving the rice field free of nutrient competition from weeds to maximize your yield potential per hectare.

Dosage: 50–60 mL / 16 liters of water  
or 500–600 mL per hectare
