

RESCUE EQUIPMENT FOR COLLAPSE STRUCTURE

- HIGH PRESSURE LIFTING BAGS 8.0 BAR (FLAT FORM LIFTING BAG)

Brand: Savatech, made in Slovenia

Description: Flat Bags are perfected standard lifting bags. Due to the construction the entire bag surface lifts evenly providing a constant lifting force independent of the lifting height. The levelled bag surface provides a larger contact surface & an improved safety during use, especially when two or even three bags are placed one top of each other. These bags are made from an excellent wear resistant rubber compound & are Kevlar kord reinforced.

Set includes:
